mers in the negative, though they can rarely, if ever, make a detailed exhibit of their debits and credits, which will prove either side of the question. Yet record of the expenditures of the it is a self-evident fact that farming farmer's family, meluding in the latter pays the nation. It is our great producing industry, the main-spring which keeps all the machinery of transportations in the machinery of tation, commerce and manufactures in motion, creating a value of untold millions out of materials which have no millions out of materials which have no and guides to success.

seein, it is no more so that the accurate business ous headache, dizziness, billionsness, men, whom it often saves from failure, and taste in mouth, dyspepsia, inward piles, all complaints of the stomach and bowels. They act gently, withs labor. If therefore on the one hand, farming does not pay the individuals and only when so managed have we who pursue it, there must be some-thing wrong in the system by which the wealth created by its labor is divided; or if on the other, it does pay the individual, there must be something wrong in the system by which his are layers, is considerably different from "London Hair color Restorer," the best dent Individuals should profit by

stating the capital invested in his Young hens may be killed two weeks business, in both its real and personal after eeasing to lay, and, if well han-branches, by treating the entire value of each as a business investment. Just thrown on the market at an advance of the control of the co here the farmer should act on the same principale that would be adopted by a manufacturer to determine the amount of his business capital. In it would be included all buildings used for manufacturing, and the land and privileges occupied by the same, the machinery, implements, vehicles and teams employed exclusively in the business, each and both raw and manufactured stock on hand, and the credit balance be-

sively for the business of the farm, stock of all kinds kept, all teams kept for farm work, all cash creps and manures on hand, and the credit balance between farm bills payable and receivable. From this inventory he should exclude his dwelling-house and all attached buildings and grounds not used for farm unresses, and all im—Lucern eaten, while a pair consuming a small quantity produced five quarts of milk for every 100 pounds of green month produced a gam of about twenty pounds; that is, fifty pounds went to supply the waste of the system and all above that went to increasing weight. In coss, a pair consuming a small quantity produced five quarts of milk for every 100 pounds of green month produced a gam of about twenty pounds; that is, fifty pounds well on, or address the under; between the supply the waste of the system and all tatched buildings and grounds not make the first pounds of meal pounds of me used for farm purposes, and all im- Lucern eaten, while a pair co plements, vehicles, teams and fixtures provided for the pleasure or comfort of his family, because, as in the case of the manufacturer, they are all an outside expenditure and not essentially connected with his strictly business operations. In the transaction of his affairs he should charge to the farm all labor, including board, whether it be

ed the whole year, when the fact is, some or all the members have spent weeks and eyen months in other business, attenuing school, in travel, researching it out grain is so placed in a trough, with slats over the top, to prevent the fowls from scratcking it eat and dirtying it. The creation or amusement; and it would be a manifest injustice to the farm to charge it for time thus occupied. He should charge all seeds, manures and fertilizers used, whether produced on the farm winter. used, whether produced on the farm or purchased, all new implements purchased, and for all repairs of exclusively farm buildings, fixtures, tools and vehicles, and also for taxes and interest on all real and personal farm property. Contra: He should give the farm credit for every kind of crop or product sold from it, at the price received, and for all the grain, ment, vegetables, milk, butter, shows are and other realists. butter, cheese, eggs and other products taken from his family, at their value on the farm, and whether wasted or get skim-milk, he need look no further. consumed. This last item is of the utmost importance, and chould be rigidly adhered to by the farmer as by the country merchant who charges to his family all the dry goods, groceries and weather, is to wash their coats in the marring with a description of walnut necessary supplies taken by them from his store. At the expiration of the year, a new inventory should be taken, embracing exactly the same items as the original, and the sum of this inventory should be taken. and credits balanced with the sum of the already deposited in the skin, and credits balanced with the sum of the debts, and the first inventory will show him his gains or losses for the year. To many, perhaps most, farmers, the keeping of books is irksome and perplexing, and therefore neglected; but it is absolutely necessary if farming is a business to be beaten eggs. Bake in a round the beaten eggs. Bake in a round perpendicular to the beaten eggs.

body else, can say that his business body else, can say that his business does or does not pay, unless the exhibit is made by a regular, correct account kept he might. probably would, find hop-water; let scald ten minutes, then that his business was a good one, the trouble with his final bank account being caused by a deficiency of labor debits into a stone jar and keep where it is and excess of family expenditures. | cool.

The person engaged in general farming, is really pursuing several distinct kinds of business, each of which requires special operations and has its own interest in the special operations and has its own interest in the special operations and has its own interest in the special operations and has its own interest in the special operations and has its own interest in the special operations and has its own interest in the special operation of the special operations are special operations. come and expenditure. HOW TO GET MOST EGGS.

midividual, there must be something wrong in the system by which his business accounts are kept, or he could show by his balance-sheets, his exact business income and expenditure, the amount of his profit or loss. The latter is probably the general fact; or more properly, it is the fact that the farmer has no business system, and does not keep his accounts in such form and with such accuracy as to exhibit the true results of his business operations.

Business enterprises in their income and expenditure are one thing, and the support of a family with all its incidental costs, another and very different one. The farmer usually does not notice this but assumes that the gross sum of his yearly expenses are farm expenses, though these may be but a monety of the amount. In his calculations he is prone to error in stating the capital invested in his harders in health treated and working the capital invested in his harders in health treated and the suggest of the control of the control of the farmer usually does not notice this but assumes that the gross sum of his yearly expenses are farm expenses, though these may be but an moutty of the amount. In his calculations he is prone to error in stating the capital invested in his harders in health treated and most deading and the capital invested in his harders in his latter of the control of the farmer usually does not notice this but assumes that the gross sum of his yearly expenses are farm expenses, though these may be but an moutty of the amount. In his calculations he is prone to error in stating the capital invested in his harders in health treated and most deading and the restorer, the date of feeding hose that are deges that the ference was not defected. Having and most cleanly article ever introduce to the dame of feeding the capital invested in his harders and good qualities; while in the ference root want for get in the health of the farmer and most cleanly article experiments and most cleanly article ever introduce to the dame from the feed of the dame and fro

on hand, and the credit balance be-tween bills receivable and bills payable. There is one point to be remembered: it takes a certain amount of lood to keep But he would exclude from it his dwelling house and everything thereto belonging both real and personal, because they have nothing whatever to do with his business but are an outside with the animal alive, and after that all the This fertilizer was used in this county last year and the result to build the body, or to produce fat. It is nonsense to talk of pullets being the proves conclusively that it has no superior. It was tried by the side of some of the best brands, and it is the animal alive, and after that all the the animal alive, and after the alive alive a do with his business but are an outside expenditure distinctively differing from it.

The farmer should take an annual inventory and it should include all his farming lands, and if he owes it, enough wood-land to keep his farm fences and exclusively from buildings in repair, all his buildings erected and used exclusively for the business of the farm, stock of all kinds kent, all teams kent.

labor, including board, whether it be on the farm or attending to its business abroad, or whether performed by persons hired, or by the farmer, his wife, sons, or daughters. But he should be very careful to charge only for service actually rendered.

It is quite common for the farmer to say that timeelf and family have labored the whole year, when the fact is proven the fowls from scratching it out.

pursuit, and is to be conducted by those papered pan for twenty-five minutes in a slow oven. Ten minutes after baking, frost with the white of one egg, hess enterprises.

The beaten eggs. Bake in a round one therough bred South down Buck for sale, 2 years old Price \$25.00. Also six 3-4 Southdown Buck lambs for sale low, will be ready for delivery grated cocoa-nut.

OPIUM and Storp tion Habit absolutely and open from Pathlers to publishy from and for puriled to.

107 Washington St., Chicago, III. This liniment very naturally originated in America, where Nature provides in her laboratory such surprising antidotes for the maladies of her children. Its fame has been spreading for 35 years, until now it encircles the habitable globe.

The Mexican Mustang Liniment is a matchless remedy for all external aliments of man and beast. To stock owners and farmers it is invaluable. A single bottle often saves a human life or restores the usefulness of an excellent horse, ox, cow, or sheep. MEST! ALADDIN THE BEST HOUSEHOLD OIL IN USE. stores the usefulness of an excellent horse, ex. cow, or sheep.

It cures foot-rot, hoof-all, hollow horn, grub, screw-worm, shoulder-rot, mange, the bites and atings of polseonous reptiles and insects, and every such drawback to stock breeding and bush life.

It cures every external trouble of horses, such as lameness, scratches, swinny, sprains, founder, wind-gall, ring-bone, etc., etc.

The Mexican Mustang Liniment is the quickest cure in the world for accidents occurring in the family, in the absence of a physician, such as burns, scalds, sprains, cuts, etc., and for rhoumatism, and stiffness engendered by exposure. Particularly valuable to Miners.

It is the cheapest remedy in the world, for it penetrates the muscle to the bone, and a single application is generally sufficient to cure.

Mexican Mustang Liniment is put up in three sizes of bottles, the larger ones being proportionately much the cheapest. Sold everywhere.
